

**REPUBLIC OF BULGARIA**

**MINISTRY OF ENVIRONMENT AND WATER**

**Ref. № 48-00-240**

**Sofia, 28.02.2013**

## **REFERENCE**

The present reference is issued by the Ministry of Environment and Water to certify that Remote Sensing Application Center – RESAC, UIC: 131453380 is the contractor of a Contract for Service № Д - 30-234/16.10.2012 with subject: “Identifying floodplains for pilot areas of Lom, Nikopol, Belene and Ruse, preparation of GIS-projects for visualization of floodplains and training of users to work with them” within project “Stakeholder Oriented Flood Risk Assessment for the Danube Floodplains”, SEE A/077/2.1/X, (DANUBE FLOODRISK), financed by Operation Programme “Southeast Europe 2007-2013”.

The contract between MoEW and Remote Sensing Application Center – RESAC with a total value of 23 868.00 BGN (including VAT) was concluded on 16.10.2012 and implemented within contract period – 31.10.2012. The following main activities were included within the scope of the contract:

- Identifying floodplains of four settlements (Lom, Nikopol, Belene and Ruse) and preparation of illustrative/overview maps of floodplains corresponding to events with a return period of 1000 years and 100 years on orthophoto.
- Preparation of GIS-projects for visualization of floodplains of four settlements (LOM, Nikopol, Belene and Ruse), based on free GIS-software, free to use and working with data compatible with ArcGIS-formats.
- Training of users for work with GIS-projects for floodplains.

The implementation of the contract was coordinated by European and International Projects Directorate of MoEW managing project DANUBE FLOODRISK.
